

CAROSAFE

PREVENTION IS BETTER THAN CURE

NON TOXIC- BIO STATIC SURFACE PROTECTANT
PROVIDES 24/7 PROTECTION AGAINST
COVID-19 FOR 30 TO 90 DAYS

INDIA CAN FIGHT BACK

DON'T LET THE LOCKDOWN - KNOCK YOU DOWN -
INSTEAD KNOCKDOWN THE CORONA VIRUS -

WHAT IS CAROSAFE?

CAROSAFE is a 5th Generation state of the Art Anti-Microbial patented formula which is totally Non-Toxic & therefore can be used on a variety of surfaces safely & without any side-effects in your Homes, Offices, Factories & Cars giving you 360 degrees' protection for 30 to 90- Days. Once sprayed on any surface CAROSAFE immediately forms a LONG LASTING PROTECTIVE LAYER of NON TOXIC - BIO STATIC MOLECULES WHICH ATTRACTS THE COVID-19 VIRUS FROM THE AIR AND DESTROYS IT ON CONTACT.

CAROSAFE TRIPPLE ACTION = SANITIZER + PROTECTION + AIR PURIFIER
- LONG LASTING 30+ DAYS

To provide immediate protection against covid 19
- at your home - car, office / factory: Use CAROSAFE

ABOUT US

GLOBAL ONE ENTERPRISES PVT. LTD. is a part of diversified group of companies with headquarters in Mumbai India. The group is headed by a team of reputed and experienced professionals with decades of entrepreneurial experience, pioneering expertise & foresight. Rising up to meet the challenge in INDIA to combat the pandemic of the COVID-19 CORONAVIRUS the group has used it's considerable good will & global relationships to negotiate & acquire an **EXCLUSIVE** distributorship of product lines from USA. The product range features the novel **LONG-LASTING, NON-TOXIC, BIOSTATIC, ANTI- MICROBIAL FORMULATIONS** which selectively destroys over 100+ types of deadly pathogens including EBOLA, SARS, COVID- 19.

The patented formulation is made by Fortune 500 companies in collaboration with DOW Chemical, Carosafe GB-500™, MERCK & BASF and is being extensively used in the USA and worldwide.

Our Group

At Global One & CAROSAFE GB-500™, we are rethinking, repurposing, and reintroducing amazingly effective active molecules as the backbone of a new era of antimicrobial protection. These products are designed to meet today's and tomorrow's critical microbial challenges. These ongoing efforts are propelling CAROSAFE as a market leader and reliable partner in the customization of formulations that effectively serve at-risk priority markets, that are critical to human sustainability.

CAROSAFE

- ✦ Made in USA in collaboration with DOW < MERCK<BASF - some of the biggest and most reputed Chemical companies in the world.
- ✦ Being used extensively in the USA and worldwide since many years.
- ✦ EPA and FDA registered - cleared for use in all areas including food grade products and packing. effectiveness established by several scientific studies.
- ✦ Easy to use - can be sprayed over huge areas using big electrostatic spraying machines and smaller areas using portable units.

OUR PRODUCTS

CAROSAFE GB 300

SPECIALLY FORMULATED FOR PERSONAL AND DOMESTIC / SMALL SCALE USE

1. CAROSAFE GB-300™ – 5 LITRE Jerry can treat upto 12500 sq ft with one five litre can you can buy multiples of this product for large scale treatment needs using back pack spraying machines . Target market : Buildings / Malls / Offices / large corporate and Govt buildings / Hotels / Shops.

2. CAROSAFE GB-300™ – 1 LITRE PRESSURE BOTTLE
This imported 1 litre high pressure spray CAROSAFE GB 300 bottle contains RTU – Ready to use liquid solution – sufficient to treat approximately 2500 sq.ft.

CAROSAFE

OUR PRODUCTS

CAROSAFE GB 300

SPECIALY FORMULATED FOR PERSONAL AND DOMESTIC / SMALL SCALE USE

1. CAROSAFE GB 300™ - 500ml is recommended for Personal and Domestic use i.e Cars, homes, personal spaces, work spaces, kitchen etc.

2. CAROSAFE GB 300™ - 250ml is recommended for Personal and Domestic use i.e Cars, homes, personal spaces.

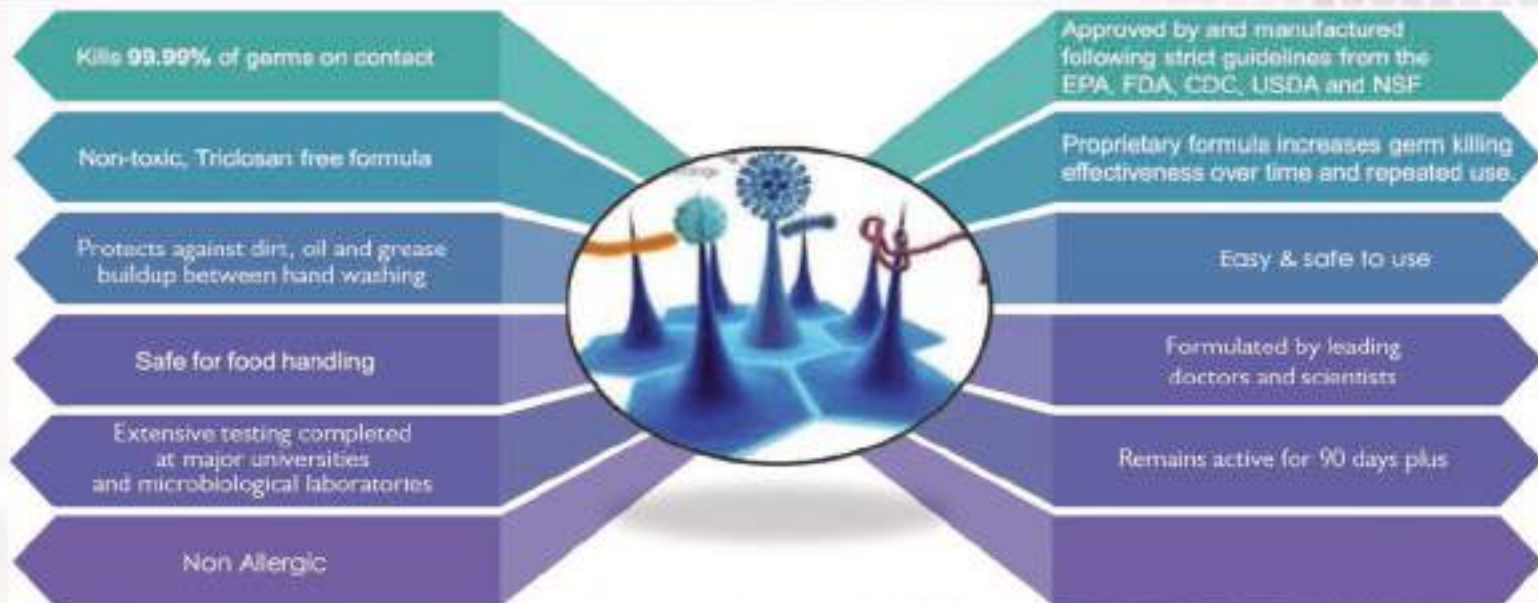

3. CAROSAFE GB 300™ - 100ml is recommended for Personal use and personal spaces, dining table rest rooms, door knobs, handles, etc.

CAROSAFE

FEATURES & BENEFITS

**CAROSAFE TRIPPLE ACTION = SANITIZER + PROTECTION + AIR PURIFIER
- LONG LASTING 30+ DAYS**

USING OUR PRODUCTS WE CAN PREVENT MORE THAN 100 MICROBES & PATHOGENS LIKE SARS, EBOLA, ZICA, CORONAVIRUS & COVID-19.

CAROSAFE DESTROYS 99.99% CORONAVIRUS IMMEDIATELY ON CONTACT AND PROTECTS THE TREATED SURFACE FOR 30 DAYS

— CERTIFIED BY ICMR — AFFILIATED CSIR — IMTECH GOVT. OF INDIA LABORATORIES .

1. The RNA was isolated as per the kit protocol and stored in 50 µl volume buffer. The qRT-PCR was performed using 9 µl of the stored RNA sample as a template. The assay protocol for qRT-PCR was setup following the kit manufacturer's instructions.

2. The analysis of the virus amplification was based on quantification of viral RNA present in the surface suspension using qRT-PCR.

Study Conclusion

Sample tested non-detectable after swabbing with Carosafe.

S. No.	Visual inspection	Control	Carosafe swabbed sample	Carosafe swabbed control	Initial Ct	Post-treatment Ct	Log10 copies/ml
1	Positive	11.1	27.2-48.7	11.1	11.1	48.7	99.9
2	Positive	11.1-11.1	28.1	11.1	11.1	48.9	99.9

The surface swabbed with CAROSAFE and stored at standard laboratory conditions for 30 days with observation for appearance, texture, appearance, odour, colour, and substance of CAROSAFE in 10 minutes contact time tested in this study. Moreover, no observable virus amplification was observed in the swabbed surface. The apparent cytotoxicity was observed in the cells for the time periods tested. The surface time tested the virus was non-detectable after swabbing had visible dried white/black stain. Post-treatment the treated surfaces were not cleaned or wiped to maintain the integrity of the surface. The test reports valid for the CAROSAFE sample tested in this study provided by the study sponsor.

ID: A220002004-1 **TEST REPORT**

Procedure: ASTM E2349-05
Sample Surface Name: Only use MBT Floorboard table
Sample surface area: 25 sq. centimeter

Hours	Date of Test	Bacterial strain	Inoculum Size (µl/ml)	Contact Time	Total Plate Count after treatment (CFU/ml)	% Reduction
0 hours	28.07.2020	S. aureus (ATCC 25922)	1.75x10 ⁸	15 minutes	520	99.99%
48 hours	30.07.2020	—	—	15 minutes	500	99.99%
15 days	12.08.2020	—	—	15 minutes	500	99.99%
30 days	27.08.2020	—	—	15 minutes	500	99.99%
0 hours	28.07.2020	S. aureus (ATCC 43308)	1.75x10 ⁸	15 minutes	520	99.99%
48 hours	30.07.2020	—	—	15 minutes	500	99.99%
15 days	12.08.2020	—	—	15 minutes	400	99.99%
30 days	27.08.2020	—	—	15 minutes	600	99.99%
0 hours	28.07.2020	Streptococcus (ATCC 19612)	1.64x10 ⁸	15 minutes	500	99.99%
48 hours	30.07.2020	—	—	15 minutes	500	99.99%
15 days	12.08.2020	—	—	15 minutes	500	99.99%
30 days	27.08.2020	—	—	15 minutes	500	99.99%

CONCLUSION: There was a 99.999% reduction in multiple bacterial strains from immediate contact till 30 days.
